PROFESSIONAL SUMMARY

Frontend developer with 2+ years of experience building responsive, production web applications across fintech, government-compliance, and e-commerce domains. Proficient in React, Next.js, TypeScript, and Tailwind CSS, with hands-on experience integrating Firebase backends, building stateful UI systems, and shipping features within Agile teams. Known for clean, maintainable code and strong attention to detail under deadline pressure.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python
Frameworks & Libraries: React, Next.js, React Native, Tailwind CSS
Backend & Tools: Firebase (Firestore, Auth), Node.js, REST APIs, Git, GitHub, JIRA
Professional: Attention to Detail, Communication, Teamwork, Problem-Solving, Time Management

WORK EXPERIENCE

- Frontend Developer** Luciano Designs | Lagos, Nigeria | Remote May 2026 – Present
 - Built and maintained a full e-commerce cart system (Context API + useReducer, persistent cart drawer, localStorage state hydration) for a luxury interior design storefront built with Next.js, TypeScript, and Tailwind CSS.
 - Integrated Firebase Firestore across typed service modules for users, products, and orders, alongside email/password authentication, to support secure customer transactions.
 - Developed reusable UI components, including a floating navigation bar, an autoplay product carousel (shadcn/ui + embla-carousel), and a custom FAQ interface, improving design consistency and mobile responsiveness.
 - Shipped ongoing UI updates and feature enhancements based on business requirements, maintaining cross-browser compatibility across devices.
- Junior Frontend Developer** eTranzact International Plc | Lagos, Nigeria | Hybrid June 2025 – May 2026
 - Built and deployed the FIRS and NRS e-invoicing websites within the Corporate Solutions unit, supporting Nigeria's government-mandated e-invoicing rollout.
 - Developed landing pages and middleware that improved user experience, using JIRA to track delivery within an Agile sprint cycle.
 - Migrated legacy project repositories to GitHub, resolving a Git history/file-size issue by removing a 146MB asset via an orphan-branch rewrite to restore full version control.
- Animation Content Creator** MrBat Animations | Remote August 2024 – May 2025
 - Created high-quality 3D animations using Plotagon Studio and edited weekly videos with CapCut to grow viewership and engagement.
 - Collaborated with the creative team in brainstorming sessions to generate content ideas and maintained a consistent publishing schedule, improving audience retention over time.
- Frontend Developer Intern** TheRootHub | Uyo, Akwa Ibom January 2023 – July 2023
 - Completed structured training in frontend development and Python, gaining hands-on experience with React Native and Next.js.
 - Built and maintained REST APIs consumed by external clients and developed responsive UIs with HTML, CSS, and JavaScript, using Git and GitHub for version control.

PROJECTS

- Automated Clearance App** · Next.js · TypeScript · Tailwind CSS · Firebase
Web platform replacing a manual HR clearance process at the NYSC. Organisations register corps members, initiate clearance workflows, and generate signed clearance documents digitally, with role-based access for admins and supervisors. Firebase Auth + Firestore handle authentication and real-time state across the pipeline.
- NRS Website (FIRS e-Invoicing)** · Next.js · TypeScript · REST APIs · JIRA
Government-compliant e-invoicing platform for the Federal Inland Revenue Service (FIRS) of Nigeria, enabling businesses to generate, validate, and archive electronic invoices per NRS regulations. Contributed to the public-facing FIRS site and NRS business portal — landing pages, onboarding flows, and middleware connecting the frontend to backend invoice validation services.
- Memory Jogger** · React · Vite · CSS · Deployed on Netlify
Interactive card-matching memory game built with React and Vite, tracking attempts, elapsed time, and match count in real time via component state. Cards shuffle each round using a Fisher-Yates algorithm. Deployed live on Netlify with custom Open Graph metadata for social sharing previews.

EDUCATION

B.Sc. Computer Information Systems
Babcock University, Ogun State, Nigeria

July 2024
