PROFESSIONAL SUMMARY

Junior Frontend Developer with a B.Sc. in Computer Information Systems and 3+ years of experience building responsive, secure, and scalable web applications with React, Next.js, and TypeScript. Skilled in consuming REST APIs, implementing authentication flows, and translating Figma designs into production-ready, component-based interfaces. Experience delivering business-facing platforms and government-compliant digital services, with an emphasis on performance, accessibility, and cross-browser reliability. Strong Agile collaborator with a growing interest in building intuitive, high-performance financial products.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React, Next.js, Tailwind CSS, shadcn/ui, Firebase
- **Tools:** Git, GitHub, JIRA, Vite, Vercel, Netlify

WORK EXPERIENCE

Frontend Developer — Luciano Designs

May 2026 – Present

Lagos, Nigeria (Remote)

- Build and maintain a customer-facing web application, implementing on-page SEO practices — structured data and metadata configuration — to improve search visibility.
- Developed a full e-commerce cart system using Context API and useReducer with persistent state hydration, integrating Firebase Firestore for secure product, order, and user data management.
- Engineer reusable, scalable UI components following component-based architecture principles, collaborating cross-functionally to ship iterative feature updates across devices and browsers.

Junior Frontend Developer — eTranzact International Plc

June 2025 – May 2026

Lagos, Nigeria (Hybrid)

- Built and deployed multiple business-facing platforms, including a government e-invoicing portal, developing secure, compliant interfaces for regulated workflows.
- Developed onboarding flows and frontend middleware connecting the UI to backend services, consuming REST APIs to display real-time transactional data, while collaborating with backend engineers on API contracts through Agile sprint ceremonies.
- Maintained version control health across multiple concurrent projects on GitHub, resolving a critical 146MB asset bloat issue via an orphan-branch rewrite to improve build performance.

Frontend Developer Intern — TheRootHub

January 2023 – July 2023

Uyo, Akwa Ibom, Nigeria

- Built responsive, client-facing user interfaces using HTML, CSS, JavaScript, and Next.js, integrating REST APIs and handling asynchronous data fetching and error states.
- Used Git and GitHub for version control across multiple concurrent client projects, contributing to consistent, on-schedule delivery within a collaborative team environment.

EDUCATION

B.Sc. Computer Information Systems

July 2024

Babcock University, Ogun State, Nigeria

PROJECTS

FX Plus

- Built a forex and stock market analysis application to help traders make faster, better-informed decisions, addressing the need for timely, consolidated market data in one place.
- Implemented secure user authentication and personalized watchlists, engineered server-side data integrations to protect sensitive credentials, and delivered real-time price data and AI-generated market observations.

NRS Website — FIRS e-Invoicing Platform

- Built a government-compliant web platform enabling Nigerian businesses to generate, validate, and archive electronic invoices, replacing a fragmented manual process.
- Developed the public-facing website, business portal, onboarding flows, and middleware connecting frontend to backend validation, solving UX challenges around multi-step form validation in a high-accuracy regulatory context.

Automated Clearance Application

- Delivered a digital clearance platform for a national agency, replacing a manual, paper-based HR process with a streamlined online workflow featuring role-based access and a per-member status dashboard.
- Implemented digital document generation, reducing turnaround time and administrative overhead compared to the previous manual process.
